

Solum | LOUNGE

Solum // Departure

Recently, I have been deeply captivated by erosion and its many recurrent forms.

Initially, I was drawn to the immeasurable beauty within the fluid surfaces which, by patterning themselves in a wave of seamless prose, ripple across their ancient bodies, from fissure to face, in one harmonious and continuous rhythm.

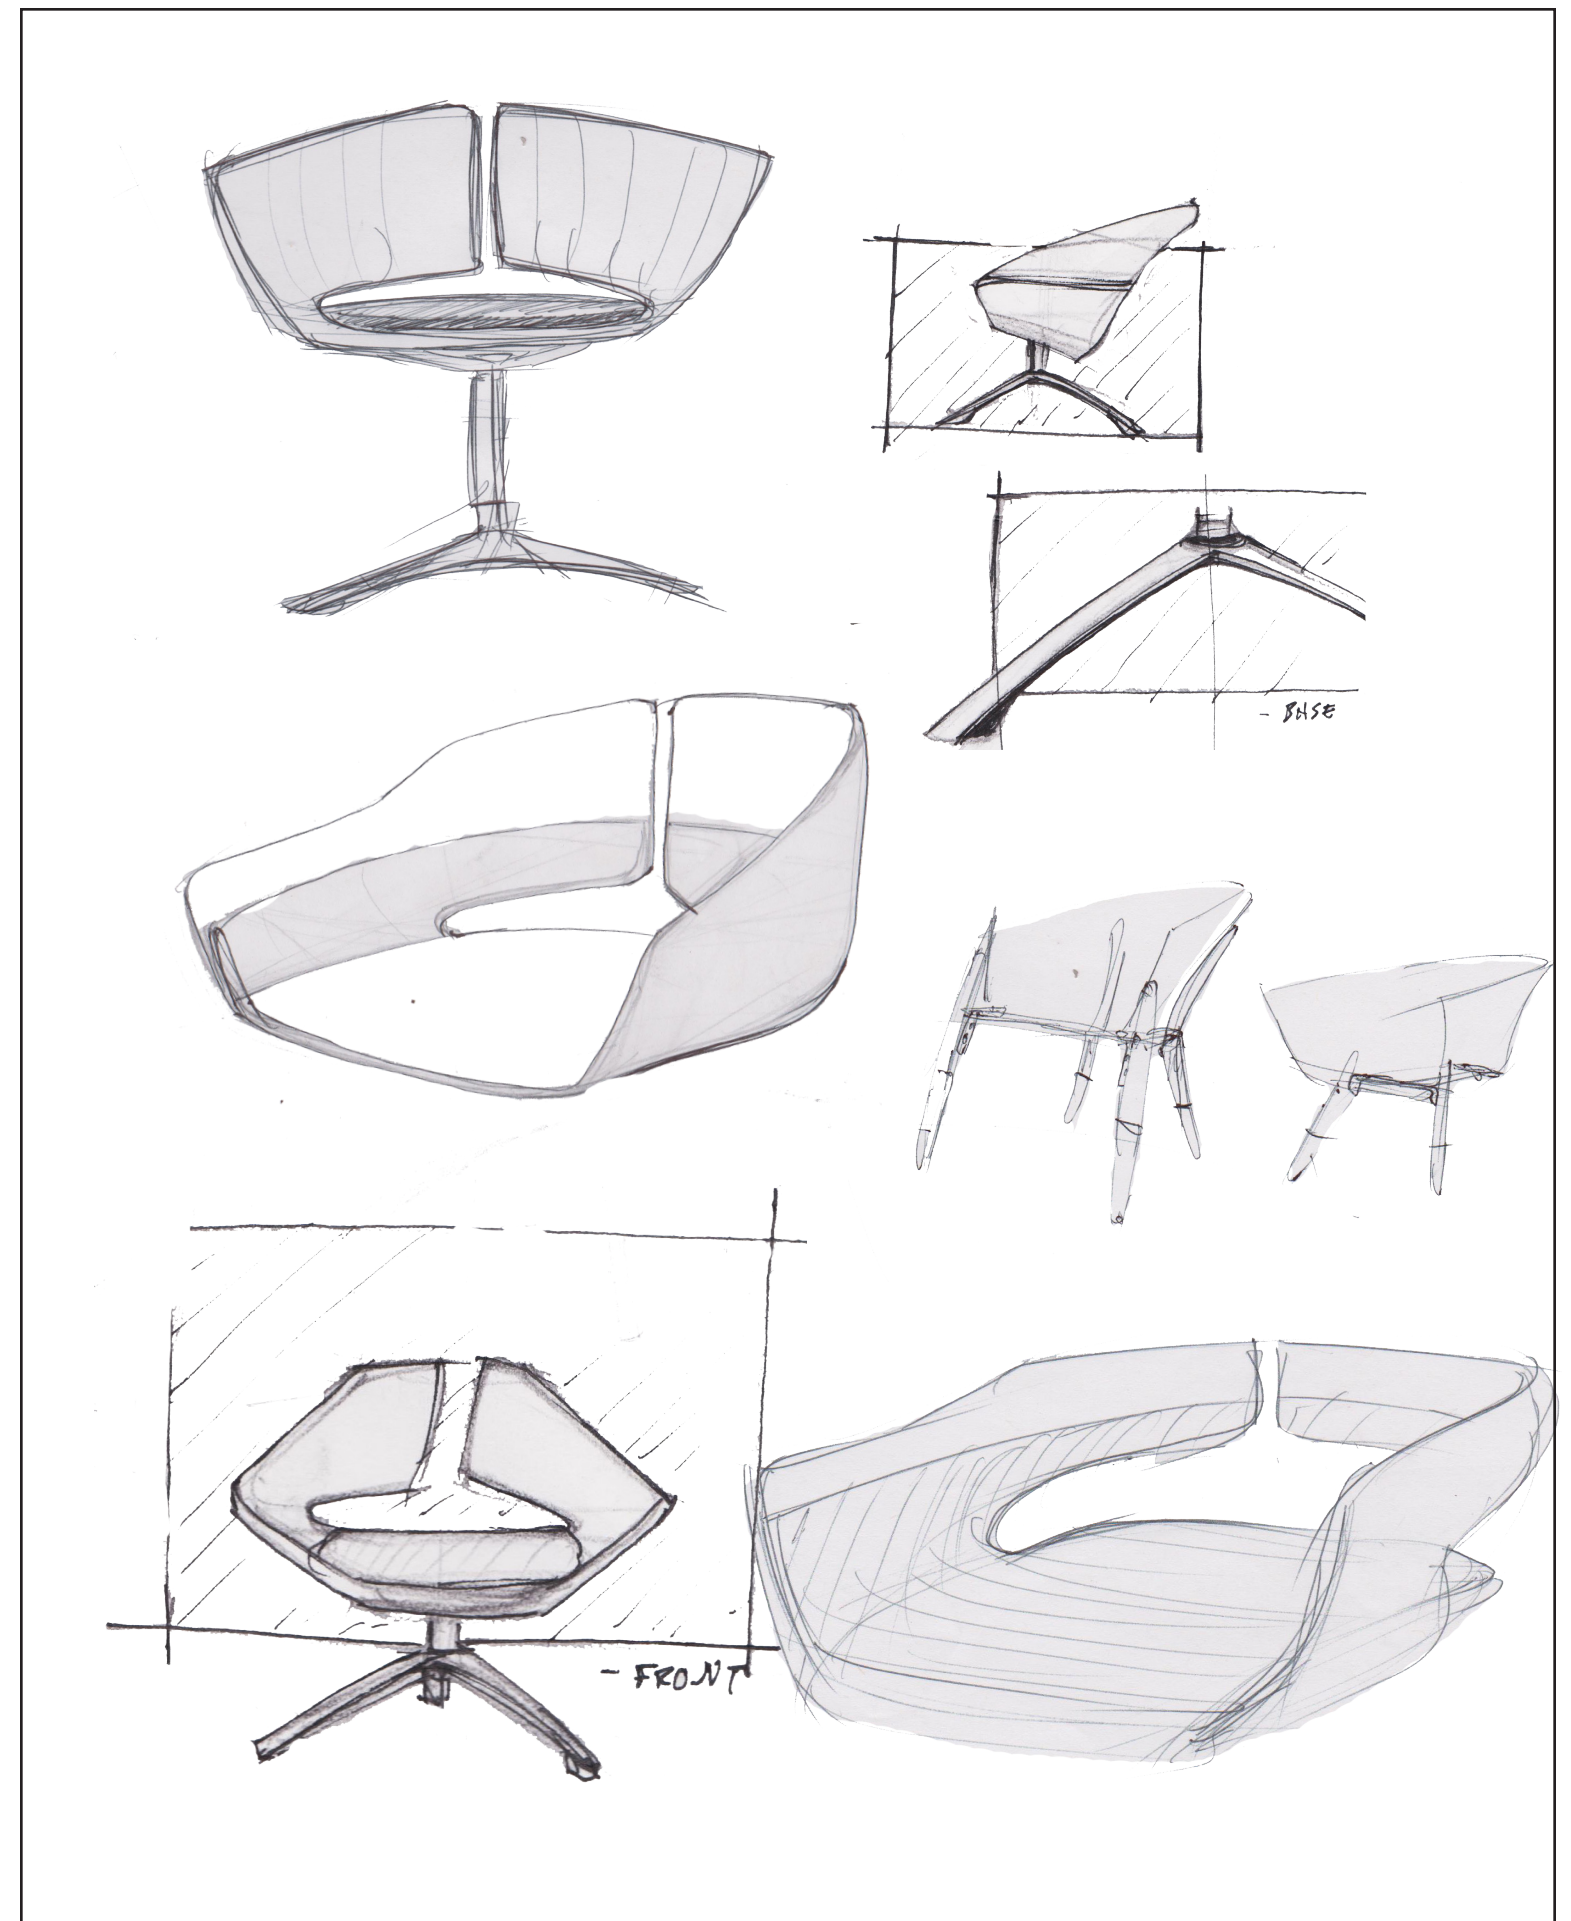

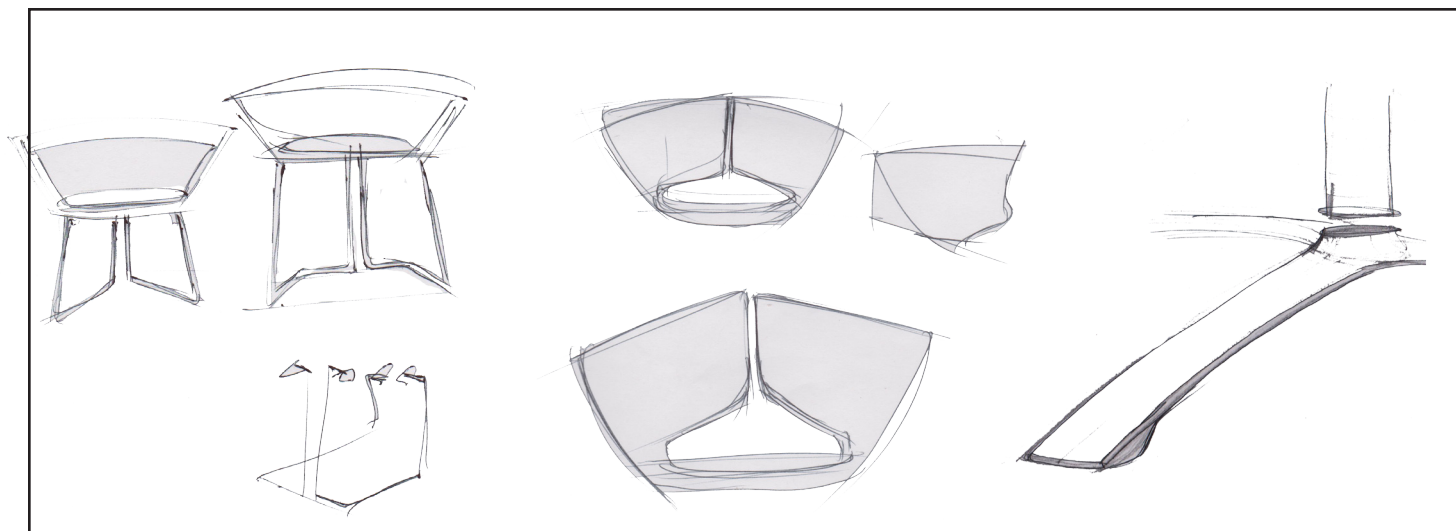

What further captivated me was a new sense of realization that these surfaces were created as a harmonic yet static response to movement. They are the rigid footprints of a very fluid force.

It was within this dynamic interchange between force and form that I found my point of inspiration for the Solum lounge.

I began ideation by exploring how we as humans may impress force or gesture into the static forms of chairs.

Solum // Ideation

Solum // Relization

Solum // Cast Base

The Solum lounge with die cast base is precisely contemporary in demeanor with its crisp sweeping lines and austere profiling, yet its subtle form and rounded shell emit a soothing undercurrent.

Die Cast Aluminum base

Molded polyurethane Seat Shell

Solum // Wire Base

With the wire base option the low-back lounge exhibits a more atmospheric impression which pairs pleasantly with the arrangement of multiple chairs and accents.

Formed Steel based

Molded polyurethane Seat Shell

Solum // Wooden Base

*With it's warm tones and enveloping nature
the bent laminate base option exemplifies
the purity of the molded seat shell and it's
sensitive appeal.*
